

Comfort Sling Soft & Comfort Sling High Soft

Sit on Sling

Undivided Legs

Comfortable

Our Comfort Slings are designed to give the patient comfort and a sense of safety. The undivided legs evenly distribute the patient's weight in order to reduce pressure, making this a suitable option for patients with pain. These slings come in two models, one with extra head support.

Unique Fabric

Our Comfort Slings are made of Soft Air Mesh, a material exclusive to Human Care. This soft material promotes less repositioning making it the optimal choice for patients with pain. In addition, the material does not promote skin breakdown and can therefore be left behind the patient for short periods of time.

model that offers extra head support. Both slings are considered "sit-on" slings and are applied when the patient is lying down.

Functional Design

Our Comfort Slings have no reinforcements or handles and feature undivided legs that evenly distribute the patient's weight. With even distribution, pressure is reduced and patient comfort increased. Our Comfort Slings are available in a medium back and high back

Easy Care and Easy Fit
Our slings are manufactured to the highest quality standards. They feature reinforced straps and high strength nylon webbing around the sling to make them strong enough to resist even the most active use. Each sling label is colour coded to ensure quick and easy selection of the correct sling and the straps are colour coded for easy determination of required positioning.

Walking Aids

Healthcare Beds

Lifting Solutions

Hygiene

Convertible Chairs

Accessories

Extension Loops
Used to extend lift straps in order to alter lifting position or to hold leg parts together. Assorted lengths. Part no.:21180-*

Leg Padding and Supports
Ideal for users with sensitive skin or pain. Part no.: 21146-S, M, L Reinforced supports. One size. Part no. 25102

Upholstered Cover
Protects user from hanger bar impact. Not for use in a wet environment. Part no. 50866
